

SUMMARY

Results-driven Full Stack .NET Developer with 3.5 years of hands-on experience architecting and delivering scalable, enterprise-grade applications across government, insurance, B2B and SaaS domains. Proficient in C#, .NET Core, Blazor, Entity Framework, RabbitMQ, and Clean Architecture. Proven track record of translating complex business requirements. Actively seeking a Mid-level .NET role to drive mission-critical product development.

TECHNICAL SKILLS

Languages & Frameworks	C# • .NET Core 8/9 • Blazor Server • React JS
Data & ORM	MS SQL Server • PostgreSQL • Entity Framework Core • LINQ
Architecture & Patterns	Clean Architecture • Microservices • SOLID Principles • RESTful API Design
Cloud & DevOps	Microsoft Azure (Fundamentals) • Git • CI/CD Pipelines • Postman
Tools & Methodologies	RabbitMQ • SeriLog • JIRA • Agile / Scrum

WORK EXPERIENCE

Business Analytics (Pvt.) Ltd. (Digital Processing Systems, Kuwait)	October 2023 - present Islamabad, Pakistan (on-site)
Software Engineer (.NET) January 2025 – present - Built backend modules and RESTful APIs in .NET Core 9.0 for the WARBA Insurance B2B Platform, serving Warba Insurance and Reinsurance, Kuwait. - Engineered reusable front-end components in Blazor Server using the Radzen library, standardising UI patterns across the platform. - Designed a PDF generation pipeline using custom template rendering to produce compliant insurance certificates and policy documents. - Collaborated with the Team Lead on code reviews, enforcing SOLID principles and Clean Architecture across the codebase.	
Junior Software Engineer (.NET) October 2023 – January 2025 - Developed backend modules and RESTful APIs in .NET Core for FATWA, a large-scale enterprise case-management portal for the Kuwait Government. - Built and maintained core features of a Document Management System (DMS) SaaS, covering document storage, file management, and project tracking. - Delivered a full end-to-end E-Library SaaS platform with digital book management and in-browser e-reading functionality. - Integrated RabbitMQ message queues for asynchronous cross-service communication, improving system resilience. - Coordinated deliverables with the offshore Kuwait team and contributed to technical documentation and presentations.	

- Delivered web application features using ASP.NET MVC, C#, and SQL Server for international projects, meeting all milestone deadlines.
- Authored SQL implementation according to project requirements.
- Resolved post-deployment bugs and provided ongoing production support.
- Collaborated with senior developers and business analysts to translate client requirements into clean, tested C# code following agreed coding standards.

OTHER PROJECTS

Employee Verification System - BPO /Telemarketing Industry

.NET Core 9.0 | PostgreSQL | EF Core | Clean Architecture | Blazor

- Engineered a secure and scalable Employee Verification System using .NET 9.0 and Blazor, specifically targeting the needs of the BPO industry.
- Designed and implemented core functionalities to facilitate B2B engagement, enabling seamless onboarding of new client companies and managerial verification of employee credentials.

Web Services Development for Leads Management System

.NET Core 9.0 | PostgreSQL | EF Core | Clean Architecture

- Engineered a Lead Tracking System using .NET 9 following Clean Architecture principles.
- Built RESTful APIs to handle lead ingestion and data exchange for a US-based media agency.

Admin Dashboard App for Cruise Ships Management Company

.NET Core 8.0 | SQL Server | EF Core | Blazor | Clean Architecture

- Developed a responsive Admin Dashboard using Blazor Server, built reusable components to visualize fleet and crew data.
- Integrated Backend Services to handle real-time data updates and state management across the dashboard.

Booking Module Web Services for US Based Bus/Transport Company

.NET Core | SQL Server | EF Core | Clean Architecture | React JS

- Revamped and optimized the core Booking Module API to resolve critical seat calculation issues and implement new business logic.
- Collaborated on database and application logic design, focusing on data integrity and transaction efficiency to ensure reliable ticket booking operations.

CERTIFICATIONS

- Claude Certified Architect Foundations (CCAF)
Courses In Progress
